iPad

Description

It's time to push yourself! The Runtastic Push-Ups app will help you master this classic bodyweight exercise. It turns your iPhone/iPad into your PERSONAL TRAINER. Use the app to strengthen your muscles anytime, anywhere. This strength move doesn't require a gym membership or equipment. Do your body some good and let Runtastic help you live a healthier, fitter life. A scientifically developed training plan guides you towards your goal, always keeping your personal fitness level in mind. Plus, no need to count your reps: The proximity sensor in your iPhone/iPad reliably counts all your push-ups....more

What's New   Sep 8, 2016

Your favorite arms workout & push-ups app just got better!

QuickTime Player 10.x: Record your computer's screen

Languages English ▾

You can use QuickTime Player to record everything that happens on your computer's screen or on a portion of your computer's screen, along with your narration, if you'd like. This is called a screen recording.

1. In QuickTime Player, choose File > New Screen Recording.
2. Choose options for the screen recording from the arrow pop-up menu.

   - If you want to record yourself speaking as you use the computer, choose an audio input source below Microphone in the pop-up menu.

   - Choose whether you want the recording to be medium or high quality. High quality results in a larger file size.

   - If you want mouse clicks to be visible in the recording, choose "Show Mouse Clicks in Recording."

   - If you want to change where the recording is saved, choose Choose, and then select a new location.

3. Arrange the computer windows as you want to capture them, and then click the Record button.

   - If you want to record only a portion of the screen, drag the pointer to select the portion of the screen you want to record, and then click Start Recording.

     To adjust the portion of the screen you selected, drag the small gray circles along the edges of the screen recording rectangle or drag the entire screen recording rectangle to another location on the screen.

   - If you want to record the entire screen, click anywhere on the screen to start the recording.

4. To stop the recording, click the Stop button, or press Command-Control-Escape.
